Manuell betätigte Plattenschweißmaschine HSK-MSW

Manual sheet butt welding device HSK-MSW150/200/250

Picture: HSK-MSW150

HSK - Your Partner in plastics welding/bending machinery HSK – MSW - the sheet welder system!

The manual butt welding devices model HSK-MSW150/200/250 is used for butt fusion of thermoplastic sheets (e.g. PVC-U, PE-HD, PP and PVDF). The surface of the heating element is Teflon coated. The temperature control system is digital shown as set and real temperature. The weld cycle has to be executed manually. The end of the welding time is signalled acoustically

Technical data for model HSK-MSW150 / 200/250:

	Unit	HSK-MSW150	HSK-MSW200	HSK-MSW250
Length	mm	2015	2300	2300
Width	mm	700	700	700
Height	mm	550	550	550
weight (approx.)	kg	420	470	520
Maximal workingwidth	mm	1550	2050	2550
Weldablethickness*	mm	2-25*	2-20*	2-12*
Max. Welding force	N	4.500	4.500	4.500
Power supply	V	230	230	230
Heat output	kW	3,1	4,1	4,1
Maximum temperature	°C	260	260	260
Heating element, coated	mm	30 x 80	30 x 80	30 x 80

*Thickness is depending on Material (specific weld pressure) and length to weld

include:

Heating element 30x80mm for e.g. hollow panel

90° welding unit, manually operate

Self-standing frame delivered as Kit

Heavy duty rolls for movable machine

T-Grip weld bead remover

Digital timer with acoustic signal
